IN 37 YEARS

Son Finds Mother in Burlington

AFTER A LONG SEARCH.

Husband-The Son Is George Chandler of Springfield, Mass.

Burlington, Aug. 22.—Mrs. Julia Trom-day, widow, aged 62, of 32 King street, and her son, George Chandler of Springfield, Mass., have met after 37 years, during which time the son had sought

in vain for his mother. Mrs. Tromblay is a widow for the fourth time, which accounts in a large easure for the difficulty her son experneed in finding her.

Her first husband was Solomon Lavoncher of Ellenburg, N. Y., by whom she had two children, the family resid-ing in Ellenburgh. Upon his death she was married to one Chandler and two more children came, of whom one was George, of this tale. George was born in Seorgia, this state, but the family being poor circumstances, he, with the other handler girl, was "farmed out," his lot falling in with one Joseph Nephew of Ellenburg. He was then a child of two years. The elder Chandler died about this time and the twice-made widow after a reasonable period of mourning was married to John Derry. Four more hildren came, making eight in all, and Julius Tech, a New York Weaver, Then Mr. Derry died. Then came Julius Tromblay, and they were married. Tromblay was drowned.

The frequent changing of names of cowboy in the west, made it doubly hard for Chandler to find her when he again came east. Clue after clue was followed up until as last, through a friend in Alburg, he found her in Burlington, after 37 years.

The second when the doors were forced Tech and his wife were found unconscious. They were rushed to a hospital, but lived only a few minutes. The second control of the fider at many arteriors, herginors summoned the fider at many arteriors. hard for Chandler to find her when he friend in Alburg, he found her in Bur-lington, after 37 years.

Mrs. Tromblay resides at 32 King after they had been received at the institution. Tech was thirty-five years old; his wife was thirty. story which had previously been told him by her son. She is a remarkably oung appearing woman, with a pleasyour tub!" It was a tub that Diogenes arms. "A man has a perfect right to ing address. Three of her daughters live

the direction of Joseph A. Holmes, chief of the technologic branch of the geo-logical survey.—Columbia State.

Fish Do Not Hear.

Much controversy has taken place on the question of the sense of hearing in fish, and many experiments have been tried with a view of settling it. Some of the latest of these are those of which M. Marage has given an account in the Paris Comptes Rendus. The fish ex-perimented with were carp, tench, pike, cel and others, and the author finds no evidence of a sense of hearing. Sounds were transmitted into the water close to the fish with an energy capable of effecting deaf mutes. No effect was produced on the fish.—Forest and stream.
